

Consent Form

Consent for Collection and Processing of Your Health Data

CareCrew uses AI to talk with you about your health, digitize your previous medical reports, and prepare a summary for your doctor before your consultation. Before we do this, please read and confirm the following.

1. What we collect

- Details you share in conversation with our AI assistant (symptoms, medical history, lifestyle information you choose to provide)
- Previous medical reports, prescriptions, or documents you upload
- Basic identifying details needed to link this information to your patient record (name, contact details, patient ID)

2. Why we collect it

- To digitize and organize your existing medical records
- To have a guided conversation that gathers relevant details about your current health concern
- To generate a structured pre-consultation report for your treating doctor
- To maintain your case history for future visits

We will **not** use this data for advertising, or share it with anyone outside your care team, except where required by law (e.g., a medical emergency, or a legal obligation to disclose).

3. Your consent

By checking the box below, you confirm that: - ☐ You are voluntarily providing this information for the purposes stated above, and no more data than necessary will be collected for these purposes. - ☐ You understand this is a digital health tool and not a substitute for in-person medical judgment; the AI-generated summary is reviewed by a licensed doctor before any diagnosis or treatment decision. - ☐ If you are providing information on behalf of a child (under 18) or a person under your legal guardianship, you confirm you are their parent or lawful guardian and are consenting on their behalf.

4. Your rights

You have the right to: - Access a summary of the data we hold about you and how it's being processed - Correct, complete, or update inaccurate information - Withdraw your consent at any time, and request erasure of your data (subject to records we're legally required to retain, e.g., for medical/legal record-keeping) - File a grievance with us, and escalate to the Data Protection Board of India if unresolved

Withdrawing consent will not affect the legality of any processing already carried out, and will not affect care already provided based on data collected before withdrawal.

5. Emergency exception

In a medical emergency involving a threat to your life or immediate health, we may process and share your data with treating medical staff without waiting for consent, as permitted under applicable law.
